

Caring for your Mattress Topper

Our mattress topper adds approximately 1 ½ inches of soft comfort, additional cushioning, and extra pressure point relief for ultimate rest and relaxation. You place the topper right on top of your mattress and the fitted sheet goes over both the topper and the mattress itself, holding the topper in place. We suggest you rotate your mattress topper which will also add longevity to your mattress.

The toppers do not require laundering – simply air once or twice a year.

Your topper will always 'settle' by approximately 20% in the first few weeks of use as the Cotton Rich Felt gets acclimatised. Please bear in mind settlement will occur first in the position you lie. Over time and with use settlement will take place over the full surface and the topper will level out. To aid this process, try to use the topper evenly from side to side, and end to end.
